Not classified as hazardous according to criteria of NOHSC

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Product Name: SIBELCO POTASH FELDSPAR
Company Name: Unimin Australia Limited (ABN 20 000 971 844)
Address: 49-55 Woodlands Drive Braeside
Victoria 3195
Emergency Tel.: 1800 638 556
Telephone/Fax Number: Tel: (03) 9586 5400
Fax: (03) 9586 5413
Recommended Use: The milled powder is used in abrasives, as a functional filler and as a fluxing agent in Ceramics.
Other Names: None Listed
Additional Information: Manufacturer:
Shri Vijaya Gimpex Mining
Shriman Chambers
No.8-2-293/K/311,
312 Kampalapuri Colony
Hyderabad
India

2. HAZARDS IDENTIFICATION

Hazard Classification: NON-HAZARDOUS SUBSTANCE.
NON-DANGEROUS GOODS.

Hazard classification according to the criteria of NOHSC.
Dangerous goods classification according to the Australia Dangerous Goods Code.
3. COMPOSITION/INFORMATION ON INGREDIENTS

</table>

Other Information
Contains <1% respirable crystalline silica in the quartz component.

4. FIRST AID MEASURES

Inhalation
If inhaled, remove affected person from contaminated area. Keep at rest until recovered. If symptoms persist seek medical attention.

Ingestion
Do not induce vomiting. Wash out mouth thoroughly with water. If symptoms develop seek medical attention.

Skin
Remove all contaminated clothing. Wash with water and soap. Ensure contaminated clothing is washed before re-use or discard. If irritation develops and persists seek medical attention.

Eye
If in eyes, hold eyelids apart and flush the eyes continuously with running water. Continue flushing for several minutes until all contaminants are washed out completely. If symptoms develop and persist seek medical attention.

First Aid Facilities
Eye wash and normal washroom facilities.

Advice to Doctor
Treat symptomatically.

5. FIRE FIGHTING MEASURES

Suitable Extinguishing Media
Use appropriate extinguisher suitable for surrounding environment.

Hazards from Combustion Products
Under fire conditions this product may emit toxic and/or irritating fumes.
Hazards
Non combustible material.

Precautions in connection with Fire
Fire fighters should wear Self-Contained Breathing Apparatus (SCBA) operated in positive pressure mode and full protective clothing to prevent exposure to vapours or fumes. Water spray may be used to cool down heat-exposed containers.

6. ACCIDENTAL RELEASE MEASURES

Emergency Procedures
Increase ventilation. Evacuate all unprotected personnel. Wear sufficient respiratory protection and full protective clothing to prevent exposure. Sweep up material avoiding dust generation or dampen spilled material with water to avoid airborne dust, then transfer material to a suitable container. Use absorbent paper dampened with water to pick up remaining material. Wash surfaces well with soap and water. Seal all wastes in labelled plastic containers for subsequent recycling or disposal. Dispose of waste according to the applicable local and national regulations. If contamination of sewers or waterways occurs inform the local water authorities and EPA in accordance with local regulations.

7. HANDLING AND STORAGE

Precautions for Safe Handling
Use only in a well ventilated area. Keep containers sealed when not in use. Prevent the build up of dust in the work atmosphere. Avoid inhalation of dust, and skin or eye contact. Maintain high standards of personal hygiene ie. Washing hands prior to eating, drinking, smoking or using toilet facilities. Exclude all sources of ignition from work area.

Conditions for Safe Storage
Store in a cool, dry, well ventilated area away from sources of ignition. This product should be stored away from foodstuffs and strong oxidising agents. Keep containers tightly closed when not in use and when empty.

8. EXPOSURE CONTROLS/PERSOAL PROTECTION

National Exposure Standards
No exposure value assigned for this specific material by the National Occupational Health and Safety Commission (NOHSC), Australia. However, the available exposure limits for dust not otherwise specified or ingredients are listed below:

National Occupational Health And Safety Commission (NOHSC), Australia Exposure Standards:
Substance TWA STEL
ppm mg/m³ ppm mg/m³
Dust - 10 - -
Crystalline Silica - 0.1 - -

TWA (Time Weighted Average): The average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day week.
STEL (Short Term Exposure Limit): The average airborne concentration of a particular substance over a short period of time.
concentration over a 15 minute period which should not be exceeded at any time during a normal eight-hour workday.

**Biological Limit Values**
No biological limit allocated.

**Engineering Controls**
Provide sufficient ventilation to keep airborne levels below the exposure limits. Where dusts are generated, particularly in enclosed areas, and natural ventilation is inadequate, a local exhaust ventilation system is required.

**Respiratory Protection**
If engineering controls are not effective in controlling airborne exposure then an approved respirator with a replaceable dust/particulate filter should be used. Reference should be made to Australian/New Zealand Standards AS/NZS 1715, Selection, Use and Maintenance of Respiratory Protective Devices; and AS/NZS 1716, Respiratory Protective Devices, in order to make any necessary changes for individual circumstances.

**Eye Protection**
Safety glasses with side shields or chemical goggles should be worn. Final choice of appropriate eye/face protection will vary according to individual circumstances. Eye protection devices should conform with Australian/New Zealand Standard AS/NZS 1337 - Eye Protectors for Industrial Applications.

**Hand Protection**
Wear gloves of impervious material conforming to AS/NZS 2161: Occupational protective gloves - Selection, use and maintenance. Final choice of appropriate glove type will vary according to individual circumstances. This can include methods of handling, and engineering controls as determined by appropriate risk assessments.

**Body Protection**
Suitable protective workwear should be worn when working with this material, e.g. cotton overalls buttoned at neck and wrist. When large quantities are handled the use of plastic aprons and rubber boots is recommended. Industrial clothing should conform to the specifications detailed in AS 2919: Industrial clothing.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

- **Appearance**: White to off white powder
- **Odour**: Odourless
- **Melting Point**: 1150-1500°C
- **Boiling Point**: Not applicable
- **Solubility in Water**: Insoluble
- **Specific Gravity**: 2.57
- **pH Value**: Not applicable
- **Vapour Pressure**: Not applicable
- **Vapour Density (Air=1)**: Not applicable
10. STABILITY AND REACTIVITY

Chemical Stability: Stable under normal conditions of use.

Conditions to Avoid: Extremes of temperature and direct sunlight.

Incompatible Materials: Not available

Hazardous Decomposition Products: Thermal decomposition may result in the release of toxic and/or irritating fumes.

Hazardous Polymerization: Will not occur

11. TOXICOLOGICAL INFORMATION

Toxicology Information: No toxicity data is available for this specific product.

Inhalation: Inhalation may cause the drying and irritation of the respiratory tract.

Ingestion: Ingestion of this product may irritate the gastric tract, causing nausea and vomiting.

Skin: May be irritating to skin on contact.

Eye: May be irritating to eyes. The symptoms may include redness, itching and tearing.

Chronic Effects: Prolonged or repeated skin contact may cause defatting leading to dermatitis.

Carcinogenicity: The product contains a small proportion of respirable crystalline silica as quartz (<1%). Crystalline silica has been classified by International Agency for Research on Cancer (IARC) as carcinogenic to humans by inhalation (Group 1). Furthermore, crystalline silica can cause silicosis or other lung diseases on repeated or prolonged exposure.
12. ECOLOGICAL INFORMATION

Ecotoxicity Not available
Persistence / Degradability Not available
Mobility Not available
Environment Protection Prevent this material entering waterways, drains and sewers.

13. DISPOSAL CONSIDERATIONS

Disposal Considerations Dispose of according to relevant local, state and federal government regulations.

14. TRANSPORT INFORMATION

Transport Information Not classified as Dangerous Goods, according to the Australian Code for the Transport of Dangerous Goods by Road and Rail.

15. REGULATORY INFORMATION

Regulatory Information Not classified as Hazardous according to criteria of National Occupational Health & Safety Commission (NOHSC), Australia. Not classified as a Scheduled Poison according to the Standard for the Uniform Scheduling of Drugs and Poisons (SUSDP).

Poisons Schedule Not Scheduled

16. OTHER INFORMATION

Date of preparation or last revision of MSDS MSDS created: August 2009
Contact Person/Point Emergency Advice: ACOHS ERS - 1800 638 556 (24 Hours)

PLEASE NOTE:
The information contained herein is based on data available to Unimin Australia Limited from both our own technical sources and from recognised published references and is believed to be both accurate and reliable. Unimin Australia Limited has made no effort to censor nor to conceal deleterious aspects of this product. Since we cannot anticipate or control the many
different conditions under which this information and our products may be used, each user should review these recommendations in the specific context of the intended application and confirm whether they are appropriate. It is therefore recommended that you undertake your own risk assessment in relation to your method of handling and proposed use of this product. Unimin Australia Limited accepts no liability whatsoever for damage or injury caused from the use of this information or of suggestions contained herein.
